

Dürr Consulting.

Efficient software – Efficient project

Dürr *Projects* is an integrated tool for project management that addresses tasks not covered by conventional tools. Based on long lasting experience in the processing of projects of any size, Dürr has developed a tool which assists the project manager with his daily work and serves as an information platform for all project participants.

Dürr *Projects* operates the

- data maintenance
- data preparation and
- data distribution

of project-specific information and supports compliance with well-proven processes.

Dürr *Projects* has been designed for corporate usage in the intranet and internet. Via the integrated user concept all project participants are enabled to access all information that is relevant for them.

The modular structure of the tool also allows using only selected features of the software according to the requirements of the project.

Dürr *Projects* can easily be integrated into an existing IT environment. Installation within the end user's system is not necessary as all access is carried out via a web browser.
