Floor conveyors by Dürr – successful from the ground up.

Technologies · Systems · Solutions

Typically Dürr.

We convey quality.

Dürr stands for worldwide success through innovative technologies, competence and close customer cooperation. In this way, Dürr has achieved a leading international position in final assembly within a very short time.

One component of this success is our strong conveyor technology product range: *FASfloor* encompasses high-quality and flexible floor conveyors that are always a step ahead of the rising demands for quality and cost-efficiency. This means maximum availability and more effective production. 

FASfloor – floor conveyors for the future.

Flexible, compatible and efficient.

FASfloor allows successful manufacturing from the ground up. Our process competence and the comprehensive product range of *FASfloor* support our customers already during selection of the optimal technology for the specific system. Fast and flexible adaptation to changes in the line is also possible with ease thanks to the *FASmotion* inductive energy and data transmission system. 

FASfloor – the basis for success.

Convincing variety of floor conveyors.

- **Inverted TTS**

The Twin Trolley System (TTS) developed by Dürr also proves its capabilities as the inverted TTS floor conveyor. This flexibility makes it possible to utilize a single conveyor technology from body shop to final assembly and significantly reduces the need for spare parts. Additional advantages include the high speed, the absence of slipping and the low maintenance costs. ■■■■■■

- **Skillet Conveyors**

Skillets from Dürr feature a specially integrated lifting mechanism that offers an optimal working height for every line section. The platforms can be walked on and allow for flexible division of work. ■■■■■■

- **Modular Chain Conveyors**

This technology is used for man moving and vehicle transport. Modular Chain Conveyors have impressively low maintenance efforts and their resistance to dirt makes them excellently suited for use in wet areas. ■■■■■■

- **Skid Conveyors**

Thanks to the robust technology and the resistance to moisture and dirt, Skid Conveyors are used in all manufacturing areas, from body shop to final assembly. Based on our experience in the painting area, we offer a highly advanced product. ■■■■■■

FASmotion – the inductive energy and data transmission is compatible with all Dürr conveyor systems! ■■■■■■

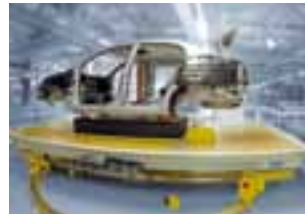

FASfloor – floor conveyors by Dürr.

FASfloor – good reasons for success.

- Dürr offers all technologies from a single source
- Optimal technology selection through benchmarking
- Worldwide presence with uniform quality standards
- FAS*motion* – the inductive energy and data transmission is compatible with all conveyor systems
- 70% of supply and services in final assembly from Dürr
- Customer-oriented planning with Dürr Consulting
- Efficient production processes through optimal material flow simulation
