

# x-aguide

## Smart up your service

The introduction of digitization in mechanical and plant engineering and the use of new technologies in this area open up new opportunities for Smart Services.

Dürr Assembly Products has developed the product "x-aguide", which makes the ever more complex and comprehensive documentation contents of the plants available faster and more efficiently.

Augmented reality technology supports the rapid detection of relevant assemblies within the systems.

At the same time, x-aguide fulfils the function for the fast provision of live images in the plant area (e.g. for fault rectification).

### CUSTOMER BENEFITS

- Fast and complete provision of information
- Targeted identification of relevant assemblies
- All kinds of information (e. g. component documentation, eLearnings, tutorials) usable
- Available at the factory and directly at the plant, several plants compatible in one device
- Training assistance
- Offline functionality
- Can be retrofitted to older systems
- Optional online support through video conferencing
- Access to smart services portfolio

# x-aguide

## Smart up your service

### PROCESS

The user moves through the installations with a live camera image on the tablet and receives a jump mark to cut, further information on this assembly via POIs (Points of Interest) which are linked to the main assemblies.

### DATA RANGE

Any type of information can be made available, such as:

- Component documentations
- Drawings, parts lists, data sheets
- eLearnings (explanation video)
- Training documents
- .... etc.

### MORE FEATURES

The Tablet is able to keep the support for entire plant parks available in one hand.

In the event of a malfunction, quick assistance can also be provided by video call to a specialist. Prerequisite: the device is equipped with a 4G SIM card.

In addition, x-aguide also provides access to other future Smart Services at any time, for example:

- The eLearnings and Tutorial Libraries
- A webshop for spare parts
- Applications for our plants
- ... etc.

The device can also be retrofitted under certain conditions for older plants (3D CAD data of the plants available).
