

Dürr India Private Limited - Environmental Policy

Dürr India is committed to reducing the impact on the environment by focusing on our products and services. With our resource-saving, energy-efficient, pollution prevention and emission-reducing innovations, we help our customers to achieve greater sustainability. Our operations aim to reduce the ecological footprint, thus enabling our customers to produce in an environmentally friendly manner.

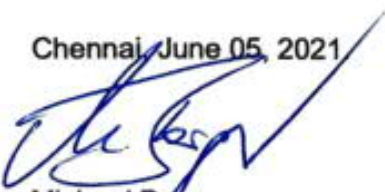

This commitment shall be demonstrated by:

- » Fulfilling the compliance obligations, internal/external regulations & other codes of practices.
- » Continuously improving our environmental management system by reduction of waste, avoiding or eliminating the environmental impacts and risks within our scope of business activities.
- » Ensuring sustainable supply chain by localization with a binding code of conduct including ecological criteria for suppliers.
- » Reduction of our ecological footprint by careful use of resources & Intensification of digital work processes in order to reduce business travels.
- » Proposing and delivering products and services to our customers that reduce emissions, reduce resource consumption, use of innovative and energy-efficient solutions through the use of state-of-the-art technologies from the Dürr Group.
- » Communicating the company's objectives and targets to the stakeholders as necessary to promote clear understanding.

Our management team will continuously endeavor to promote an environmentally friendly working culture throughout the organization, including our production facilities and at temporary sites.

We aim to achieve these goals with the involvement, participation and cooperation of a committed, well-motivated workforce.

Chennai, June 05, 2021

Michael Berger,
Managing Director.
