Dürr at a glance

The Dürr Group is one of the world's leading mechanical and plant engineering firms with extensive expertise in automation and digitalization Industry 4.0.

Our machines, plant and services enable maximum production efficiency, whether in the automotive industry, which is responsible for just over 50 % of our sales, or in other sectors such as the woodworking, mechanical engineering, chemical, pharmaceutical and electrical electronic engineering industries. We run 112 sites in 33 countries. We operate globally with our Dürr, Schenck and HOMAG brands. In addition to North America and Western Europe, we are also strongly represented in the emerging markets.

Dürr Group brands

The long-established brand Dürr has been a byword for continuous innovation since 1896, with a wide range of products in robot, process and assembly technology for all areas of vehicle production, focusing on painting and final assembly lines. Dürr also offers painting technology for general industry. In the field of environmental technology, Dürr supplies efficient systems for exhaust air purification, for increasing the efficiency of production processes and for sound insulation technology for a wide range of industries. Smart automatic and supervisory control systems and an efficient service offering complete the portfolio.

Schenck stands for over 125 years of quality and innovation in balancing and diagnosis technology. Over this time, we have contributed a great deal to their technical development and are today the world market leader. Our balancing and diagnostic systems ensure that your plane lands safely, that your razor runs quietly and smoothly and that you can enjoy the comfort of your car for long time. Jet engines, razors or engines running smoothly and without vibration will not produce excessive noise, which may be transmitted to other components or cause malfunction. Schenck RoTec provides the technology to ensure this.

We are the world's leading manufacturer of machines and systems for the wood-processing industry and trades. As a global player, we operate international production plants as well as sales and service companies. The HOMAG Group offers its customers solutions for digitized production, based on digital data continuity from point of sale through the entire production process, combined with a comprehensive software suite. Our customers use high-tech machines and systems from the HOMAG Group to produce home and office furniture, kitchens, parquet and laminate flooring, windows, doors, staircases and even complete prefabricated timber-frame buildings.

Divisions of the Dürr Group

- **Paint and Final Assembly Systems:**
paint shops and final assembly systems for the automotive industry
- **Application Technology:**
robot technologies for the automated application of paint, sealants and adhesives
- **Clean Technology Systems:**
air pollution control, noise abatement systems and battery coating lines
- **Measuring and Process Systems:**
balancing equipment as well as assembly, testing and filling technology
- **Woodworking Machinery and Systems:**
machinery and equipment for the woodworking industry

Rotary atomizers

State of the art paint application

Product families

EcoBell2 SL - rotary atomizers external or direct charge

EcoBell2 SL

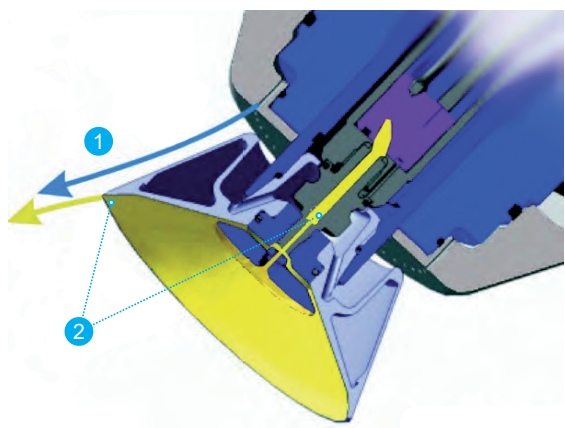

Rotary atomizers with external or direct charge

EcoBell2 SL is an electrostatic charged, state of the art rotary atomizer. Unique design and high transfer efficiency make this device to the perfect choice for everyone who is requiring top quality results. The very fine and smooth atomization is suitable even for the highest quality requirements and is moreover characterized by a transfer efficiency that is typically way higher than for pneumatic atomizers. Water-borne, solvent-borne as well as UV-paints can be processed, no matter if they contain metallic flakes or not.

External electrodes to charge the atomized paint.	Rotary atomizer with dual shaping air technology, one main needle. Paint charged internally. Integrated dump valve.
Field of use	Suitable for water-borne applications. Galvanic separation to the paint supply is not required.	Suitable for solvent-borne, water-borne and UV-paint applications as well as for non charged applications.	Suitable for water-borne applications. Galvanic separation to the paint supply is not required.	Suitable for solvent-borne, water-borne and UV-paint applications as well as for non charged applications.

TECHNICAL ILLUSTRATION

1 - Shaping air flow, 2 - Paint supply and atomization

CUSTOMER BENEFITS

- ➔ Two independently controllable shaping airs and special designed bell cup allows maximum spray pattern flexibility
- External high voltage generator with high capacity ensures a stable high voltage supply even under the harshest conditions
- All rotary atomizers are rated for ATEX Zone 1
- Suitable bell cups from aluminium and titanium for every kind of application
- Well proven quality, reliability and robustness in thousands of applications
- High efficiency turbine for a very low compressed air consumption
- Isolated paint supply is not needed for external charge applications

EcoGun AS MAN – manual air spray guns

EcoGun AS AUTO – automatic air spray guns

EcoGun AS MAN

Manual air spray guns

The Dürr collection of manual air spray guns is designed for all kind of tasks in multiple application areas. The line of gravity feed spray guns are primarily used for coating of smaller area like car body repairs, furniture lacquer application and others. There is also a line of pressure feed spray guns which are primarily used for larger area painting. Special variants of spray guns are available for heavy duty application of high solid materials like enamels or glazes.

AIR SPRAY METHODS

CONVENTIONAL

Extremely fine atomization and great surface coverage. The higher dynamic energy compared to LVLP/HVLP technology often keeps the transfer efficiency (TE) considerably below those achieved with LVLP/HVLP guns. This is due to particle bounce back from the object and increased overspray.

HVLP (HIGH VOLUME LOW PRESSURE)

Low spray pressure technology. Terminology for an internationally recognized low-pressure technology whereby the transfer efficiency rate has to exceed 65%, while the maximum air pressure under the air cap is below 0.7 bar.

LVLP (LOW VOLUME LOW PRESSURE)

Further development of HVLP technology to achieve a TE comparable to that of HVLP technology but still being able to spray difficult materials with good quality results.

EcoGun AS AUTO

Automatic air spray guns

The wide range of automatic air spray guns is tailored to fulfill many kinds of application jobs across all industries. There are spray guns suitable for standard paint applications and special coverage applications in ceramic or glass industry. Other spray guns can be used for dot marking or very small area coating. All automatic spray guns are capable for fully controlled remote operation by the production control systems.

EcoGun AA MAN – manual air-assist spray guns

EcoGun AA AUTO – automatic air-assist spray guns

EcoGun AA MAN

Manual air-assist spray guns

Manual air-assist spray guns are the perfect choice for application of high viscosity material with high demand for surface quality. Typical users are woodcrafters where they can be used to provide perfect finishing for solid wood furniture by solvent and water-borne lacquers. The wide range of nozzles make these spray guns a versatile tool. Spray guns can be fed by EcoPump VP packages.

PRODUCT LINE	
EcoGun 2100 AirCombi	
Part No.	see table below
Connector fluid	1/4" NPSM
Max. fluid pressure	120 (1,740 psi) / 250 bar (3,600 psi)
Connector air	G1/4"
Nozzle sizes	0.18 / 0.23 / 0.28 / 0.33 / 0.38 / 0.43 / 0.48* / 0.53* / 0.60* / 0.70* mm **
Technical highlights	External material inlet with optional filtration (long or short filter). Flat to round regulation. Atomization air regulation.
Field of use	Decorative and protective coatings for wood and metal substrates. Solvent-borne or water-borne lacquers. High viscosity paints and stains.

* nozzle sizes available as accessory only

** See complete range of nozzles on page no. 28 and page no. 29.

CUSTOMER BENEFITS

External paint feed (allows paint heating)

Material filter options (long and short filter)

Wide range of nozzle sizes available

TECHNICAL ILLUSTRATION

1 - Material inlet with short or long filter, 2 - Air inlet, 3 - Fan pattern size regulation, 4 - Inlet air regulation

ORDER NUMBERS – EcoGun 2100 AirCombi

Part no.	Fluid pressure	Nozzle type	Filter	Air cap
N36280001	120 bar (1,740 psi)	6-KT (hexagonal)	short filter	Air cap 40-130°
N36280002	250 bar (3,600 psi)	6-KT (hexagonal)	short filter	Air cap 40-130°

N36280004	250 bar (3,600 psi)	6-KT (hexagonal)	long filter	Air cap 40-130°

Note: Spray gun is delivered without nozzle, they need to be ordered separately. If nozzle with spray angle 30° or lower is required, please order & use other aircap (M35030077)

EcoGun AA AUTO

Automatic air-assist spray guns

Automatic air-assist spray guns are often used in batch paint application where they are a part of the automated painting process. They are characterized by a material path made of stainless steel and a separate air regulation for round and flat spray patterns, while the seal packing is externally adjustable.

PRODUCT LINE	
	EcoGun AA AUTO
Part No.	N36230001V
Connector fluid	G1/4" (male)
Connector air atom./cont.	Push-in 6x8 / 4x6 or 2,7x4 mm
Max. air pressure atom.	8.0 bar (116 psi)
Max. air pressure cont.	6.0 bar (87 psi)
Max. fluid pressure	250 bar (3,600 psi)
Nozzle sizes	0.18 / 0.23 / 0.28 / 0.33 / 0.38 / 0.43 / 0.48 / 0.53 / 0.60 / 0.70 mm *
Technical highlights	Two material inlets. Separate round/flat spray regulation. Needle seal accessible from the outside. Universal version with air valves ACV Version for flat bed machines FRC Remote control version for robot applications RC
Field of use	Decorative and protective coatings for wood and metal substrates.

* See complete range of nozzles on page no. 28 and page no. 29 .

CUSTOMER BENEFITS

Air-assist and airless work mode possible

Material pressure up to 250 bar (3,600 psi)

Material path completely made of stainless steel

Needle seal accessible from the outside

Separate round/flat spray regulation (for ACV or RC version)

Wide range of nozzles available

Material circulation or direct material supply

In-line filter available

EcoGun AL MAN – manual airless spray guns

EcoGun AL AUTO – automatic airless spray guns

EcoGun AL MAN

Manual airless spray guns

Manual airless spray guns are suitable for high pressure paint application. They can be used for anti corrosion protection coating of large steel structures or coating of wood structures. Functionality can be extended by using extensions which can help to paint areas which are difficult to reach. The modular design of these extensions allows to assemble different lengths and angles. Airless spray guns may be used with reversible nozzles that are available in a large number of sizes and angles.

EcoGun MAN ESTA – manual electrostatic spray guns

EcoGun MAN ESTA

Manual electrostatic spray guns

The line of manual electrostatic spray guns involves models with external or direct charge for air spray application method. These spray guns are the perfect solution to reduce overspray when deploying manual paint application. They are suitable for solvent or water-borne paints. Small size and light weight are providing long lasting operation without significant fatigue.

PRODUCT LINE		
	EcoGun AS MAN EC	EcoGun AS MAN DC
Part No.	see page 37	see page 37
Connector fluid	G3/8" with 60° inner cone (male)	G3/8" with 60° inner cone (male)
Max. fluid pressure	6.0 bar (87 psi)	6.0 bar (87 psi)
Connector air	G1/4" with 60° inner cone (male)	G1/4" with 60° inner cone (male)
Max. operating voltage	30 kV	60 kV
Nozzle sizes	1.1 mm	1.1 mm
Technical highlights	External charging needle. Built-in control lamp to indicate high voltage. High voltage only if the trigger is pulled.	Internal charge via electrode on tip of the needle. Built-in control lamp to indicate high voltage. High voltage only if the trigger is pulled. Model for clear and base coats. Model for metallic coats.
Field of use	For water-borne clear and base coats and fillers.	For solvent-borne clear, metallic and base coats and fillers. A model with insulated material hose is available for water-borne paints.

CUSTOMER BENEFITS

Solvent resistant composite body guarantees a light weight and a long life

Maximum charge of 60 kV for high transfer efficiency

Direct and external charging system available

Fine atomization even without high voltage

Suitable for solvent-borne paints

Overspray-free application

100% transfer efficiency

Product families

EcoPaintJet - overspray-free paint applicator

EcoPaintJet

Overspray free paint applicator

EcoPaintJet is one of the most innovative developments in the paint industry ever made. In contrary to spray guns and bells, the **EcoPaintJet** does not atomize the paint, but creates constant streams of paint. This increases the transfer efficiency to 100% or in other words 0% overspray. As a consequence of no overspray, the pollution of air filters is reduced significantly which saves operating costs. In addition the spray pattern created by the **EcoPaintJet** is razor sharp. This allows to paint stripes or other types of simple patterns without masking. Last but not least, color changes are possible within a few seconds.

PRODUCT LINE

	EcoPaintJet
Spray pattern width	50 mm
Coating distance	5-25 mm
Application speed	< 2,000 mm/s
Weight	800 g
ATEX	Ex II 3G T6

Nozzle plate is not included.

TECHNICAL ILLUSTRATION

1 - Spray pattern with overlap, 2 - Spray pattern with sharp edge

CUSTOMER BENEFITS

Paint saving (almost 100% transfer efficiency)

No masking required

Lower operating costs due to elimination of overspray (e.g. reduced booth ventilation or reduced booth filtration requirements)

Significantly better environmental balance

Dürr standard components for fluid handling are retained

Fast colour changes possible

Border-sharp striping or overlapping surface application possible

Please contact us for more details at:

Color changers

Low pressure or high pressure color changer

Product families

EcoMCC3 20 – low pressure color changer

EcoMCC 200 – high pressure color changer

EcoValve7 20 – low pressure color changer with diaphragm valves

EcoMCC3 20

Low pressure color changer

The **EcoMCC3 20** color changer has been designed for rapid color changes. During design, great emphasis was focused on an optimal feed to realize a minimum color loss and maximum maintenance friendliness. This color change valve generation can be used with water or solvent-borne primer paints, top coating and 1K clear varnishes material to enable weight optimization. The **EcoMCC3 20** can be utilized independent or in combination with **EcoBell** or **EcoGun** product package.

CUSTOMER BENEFITS

Highly flexible - can be extended at any time by adding a 2-color strip

Each color can either be configured as deadend or circulation system.

PRODUCT LINE

	EcoMCC3 20
Part No.	N14800002V
Connector fluid	Dürr paint fitting
Connector air	Push-in 4 mm
No. of colors	up to 36 colors
Max. fluid pressure	20 bar (290 psi)
Operating temperature	10-40 °C (50-104 °F)
Materials contacted by media	Polyoxymethylene (POM), Titanium, Stainless steel

EcoMCC 200

High pressure color changer

The **EcoMCC 200** is a color changer solution for airless or air-assist varnishing of water and solvent-borne paint. Due to its short switching times, the **EcoMCC 200** is also suitable as a dosing valve in 2K applications. The color change is effected quickly thanks to short flushing and low dead space. An additional chamber contains a plasticizer that prevents both, hardening of the media on the valve needle and higher wear and tear.

EcoValve7 20

Low pressure color changer with diaphragm valves

EcoValve7 20 is a low pressure color changer, designed for advanced 2K application. In contrary to classical valve designs, the EcoValve7 20 is equipped with a diaphragm seal between needle and piston. Therefore leakages are impossible. In addition, the valve opens automatically in an overpressure situation. The diaphragm valve is characterized by its extremely high lifetime, its easy to clean surface and its integrated needle seat which guarantees a fast maintenance.

EcoBell Cleaner D

Automatic cleaning device for EcoBell2

EcoBell Cleaner D is an efficient and quick solution to perform cleaning in an automatic painting process. The set of nozzles for solvent and air flushing provide reliable cleaning of the shaping air holes and part of the shroud. This ensures long lasting high quality performance in application processes.

CUSTOMER BENEFITS

- The atomizer cleaner is suitable to remove water-borne and solvent-borne paints
- Ensures reliable and long lasting operation of rotary atomizers
- Reduce maintenance times

Fluid board

Modular paint dosing and color change system

The missing link to quickly and simply create an overall concept consisting of a control unit, dosing technology, flange package and applicator with the high quality of Dürr technology. This fluid board is designed to be fully controlled by the **EcoAUC** and covers application such as 1K or 2K, low or high pressure as well compatible for **EcoBell** or **EcoGun**. In addition to the color change technology with the **EcoMCC** as well as **EcoValve7** series valves, the **EcoPump9** GW for high-precision metering or the compact **EcoFlow** regulators for flow control are used. With the **EcoPump9** GW dosing pump, Dürr has the advantages with flank flushing (only for the 3cc/min and 4.5cc/min sizes) as well as pressure sensors at the pump inlet and outlet. The compact design of the Fluid board allows installation even in small rooms and does not cause any assembly time as it is delivered readily assembled.

PRODUCT LINE	
Fluid board	
Part No.	N13170001V
No. of colors	2-10 low pressure / 1-9 high pressure
No. of catalyst	1-3
Dosing System	Dosing pump or paint pressure regulator
Gear pump dimension component A	4,5cc, 3cc, 2cc, 1cc, 0,45cc
Gear pump dimension component B	4,5cc, 3cc, 2cc, 1cc, 0,45cc
Certification	EU / UL
EX	Zone 1

CUSTOMER BENEFITS

Delivered fully assembled. Only hoses and wires must be connected

Up to 10 colors and 3 catalysts

Available for high- or low-pressure application

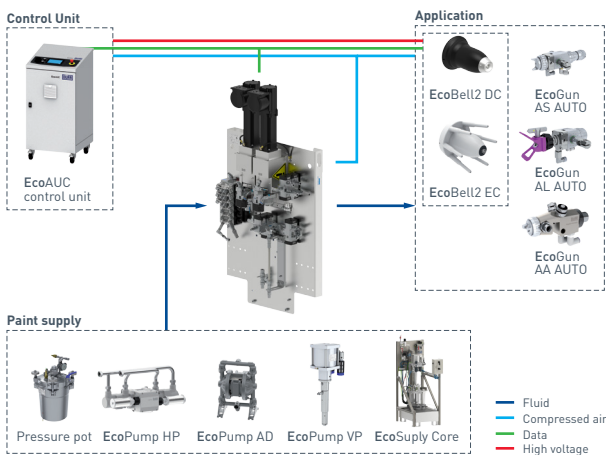

Service and maintenance friendly

In combination with EcoAUC and EcoBell / EcoGun quickly created ready 2 integrate package

Color change technology with EcoMCC / EcoValve7 series

EcoPump9 GW dosing pumps

Paint supply system

Product families

EcoSupply Core – low or high pressure paint delivery

EcoSupply P Core – reduction of color change losses for low pressure paint supply systems

Pressure pots – complete range of fluid supply containers

EcoSupply Core

Low or high pressure paint delivery

The **EcoSupply Core** is fully assembled and modular to fit all different customer requirements. Due to its small dimensions it is a quick and clean solution for your paint mix room and therefore also for different industries. It can be chosen between different high and low pressure pumps and a wide range of pressure regulators, filters, agitators etc. For the users comfort a later extend of options is possible.

Reduction of color change losses for low pressure paint supply systems

Every color change is accompanied by a certain loss of paint. In standard supply systems flushing agents and compressed air are used to clean the hoses before the next color can be loaded. Thus, the paint loss increases according to the length and the diameter of the hose that is installed between the color changer and the atomizer. To overcome this issue, Dür provides components to build so called pig system, which is a kind of rubber plug, to clean the hose. As the pig may also be used to push the paint back into the container, paint losses can be reduced significantly. But also the consumption of flushing agents decreases. By means of multiple systems, one color can be used while another hose is prepared for the next color.

COMPONENTS				
	Distributor	Source/Target Station	Hoses	Pig
Part No.	N53020036	N53110036	W40030546, W40030547, W40030548, W40030549, W40030550, W40030551, W40030552	M22200022

Pressure pots

Pressure pots with a volume of up to 60 liters

The Dürr pressure pot product group is available with or without pneumatic agitators. Pressure pots are suitable for all fluids and solvents supplying manual or automatic spray guns or other equipment. A great advantage of pressure pots is their smooth material delivery without pulsations. There is a line of pressure pots with different volumes available.

Dosing units

Solution for 2K and 3K paint application

Product families

EcoDose 2K – dosing units for two component materials

EcoDose 3K – dosing units for three component materials

EcoDose 2K Easy – dosing unit for two component materials

EcoDose 2K

Dosing units for two component materials

The Dürr **EcoDose 2K** unit is an electronic dosing system suitable for high and low pressure applications. It can be used in manual and automatic processes. Optimized for quick color changes and easy flushing, it enhances resource utilization and contributes to higher application efficiency. Fluids are measured consistently and precisely, even media with different viscosities. Typical fluids handled are 1K or 2K materials, water and solvent-borne paints, varnishes, lacquers and monolayer paints.

TECHNICAL ILLUSTRATION

	EcoDose 2K
Part No.	N10100003V
Max. fluid pressure	20 / 200 bar (290 / 2,900 psi)
Flow meter type	Coriolis / Gear wheel
Density measuring	Yes (Coriolis only) - upon request
Temperature measurement	Yes (Coriolis only) - upon request

TECHNICAL ILLUSTRATION

Material mixing principle

- 1 - Paint valve, 2 - Measured paint amount, 3 - Catalyst valve,
- 4 - Preset amount of catalyst measured, 5 - Static mixing of the paint and catalyst

CONNECTION SCHEME

1 - EcoGun Cleaner M, 2 - EcoDose 2K, 3 - EcoGun

CUSTOMER BENEFITS

- Flow rate measurement by coriolis or gear flow meter
- Exact volume controlled dosing of both components
- High and constant mixing ratio accuracy
- Monitoring of all dosing functions such as pot life, catalyst ratio and components A & B with dedicated alarm
- Automatic color change controlled by volume
- Independent flushing circuits for both components
- No premixing chamber
- Smooth start-up procedure
- Intuitive user interface for quick programming of individual settings
- High process reliability
- Different flow meter types for A and B component
- Optional remote maintenance (via network)

**** max. 10 colors in combination circulation and deadend (20bar) possible

EcoDose 2K Easy NEW

Dosing units for two component materials

The **EcoDose 2K Easy** represents the entry level of dosing units, offering high quality performances combined with the premium level components known from the **EcoDose 2K/3K** product family. The **EcoDose 2K Easy** is an electronic dosing system suitable for high and low pressure applications. It can be used in manual and automatic processes. Optimized for quick color changes and easy flushing, it enhances resource utilization and contributes to higher application efficiency. Fluids are measured consistently and precisely, even media with different viscosities. Typical fluids handled are 1 or 2K materials, water and solvent based paints, varnishes, lacquers and monolayer paints.

PRODUCT LINE

	EcoDose 2K Easy
Part No.	see part numbers on page 71
Max. fluid pressure	20 / 200 bar (290 / 2,900 psi)
Flow rate	40 – 4.000 cc/min *
Fluid viscosity range	30 – 2.000 mPas [cps] **
Mixing ratio	1:1 – 10:1
Flow meter type	Coriolis / Gear wheel
Density measuring	Yes (Coriolis only) - upon request
Temperature measurement	Yes (Coriolis only) - upon request

* Depending on flow meter type and fluid technical specs. (viscosity, paint supply equipment and pressures, ...)

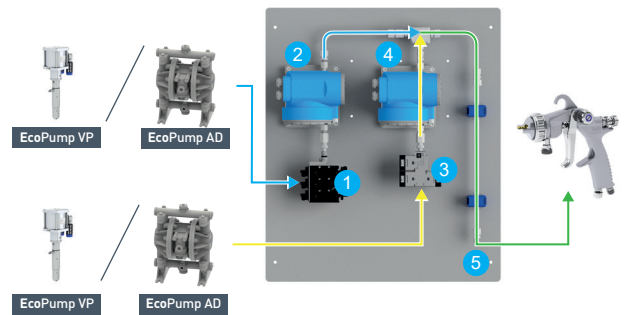

** Range to be considered as general indication, actual values depending on job related paintshop conditions

CONNECTION SCHEME

1 - EcoGun Cleaner M, 2 - EcoDose 2K Easy, 3 - EcoGun

TECHNICAL ILLUSTRATION

Material mixing principle

1 - Paint valve, 2 - Measured paint amount, 3 - Catalyst valve, 4 - Preset amount of catalyst measured, 5 - Static mixing of the paint and catalyst

CUSTOMER BENEFITS

Flow rate measurement by coriolis or gear flow meter

Exact volume controlled dosing of both components

High and constant mixing ratio accuracy

Monitoring of all dosing functions such as pot life and mixing ratio

Automatic color change controlled by volume

Independent flushing circuits for both components no premixing chamber

Smooth start-up procedure

Intuitive user interface touch screen 4,3"

Atex fluidic panel (II3G Ex h IIA T4 Gc)

Industry 4.0 compliant

Pumps

Pump solutions for any kind of application

Product families

- EcoPump HP** - air operated horizontal piston pumps
- EcoPump HPE** - electrical operated horizontal piston pumps
- EcoPump VP** - air operated vertical piston pumps
- EcoPump VPS** - air operated vertical shovel plate pumps
- EcoPump AD** - air operated diaphragm pumps
- EcoPump9 GW** - gear wheel dosing pumps
- EcoPump Packages** - ready to use sets

EcoPump HP

Air operated horizontal piston pumps

The **EcoPump HP** is an air driven horizontal piston pump. It has been manufactured and tested according to Dürr's well-proven quality standards. Performance and durability are further distinguishing characteristics in order to meet the highest demands. With a concealed shaft seal this **EcoPump HP** is primarily designed for paint circulation systems as well as fluid transfer and supply. A horizontal two piston design guarantees equal thrust on both strokes and a rapid pump change-over with a quick release valve for reduced surge. Its modular design enables easy maintenance. Typically handled fluids are water and solvent-borne paints, varnishes, enamels and lacquers.

PRODUCT LINE

HP & HPE pump principle
 1 - Material inlet, 2 - Bellows, 3 - Material suction chamber, 4 - Piston, 5 - Piston ball seat, 6 - Material outlet chamber, 7 - Material outlet ball seat, 8 - Material outlet

CUSTOMER BENEFITS

- Balanced pressure variations
- Stainless steel fluid section
- Tested according to DIN EN 12162 and well-proven Dürr quality standards
- Low icing by thermal isolation of the muffler and optimized air flow
- Four-ball design
- No exposed shaft seal
- Lubricant free
- Horizontal two-piston design guarantees equal thrust on both strokes
- Rapid pump change-over with quick release valve for reduced surge
- Modular pump design, easy to maintain
- Wide range of accessories available

EcoPump HPE

Electrical operated horizontal piston pumps

The **EcoPump HPE** is a horizontal piston pump with an electric drive to achieve superior performance with lower operating costs. It has been manufactured according to Dürr's well-proven quality standards. Durability and reliability are further distinguishing characteristics in order to meet the highest demands. With a concealed shaft seal the **EcoPump HPE** is primarily designed for paint circulation systems as well as fluid transfer and supply. A horizontal two piston design guarantees equal thrust on both strokes. Its modular design enables easy maintenance. Typically handled fluids include water and solvent-borne paints, varnishes, enamels and lacquers. The **EcoPump HPE** has been tested according to DIN EN 12162.

EcoPump2 VP

Air operated vertical piston pumps

The **EcoPump VP** is a pneumatically driven vertical piston pump for medium and high pressure applications. Proven design and long term durability make these pumps the perfect choice for small and middle applications of paint, mastics and adhesives to furniture, steel structures or walls and other objects. The **EcoPump VP** is suitable for airless or air-assist application and is available in numerous configurations with various air inlet modules, pressure relief valves, trolleys and adjacent devices.

VP PUMP PACKING

	Standard	UF	UE
Part No.	N24960039 + N24960040 (P55) N24960041 + N24960042 (P90) N24960043 + N24960044 (P110)	N24960055 + N24960056 (P55 - UF) N24960058 + N24960059 (P90 - UF)	N24960054 + N24960057 (P55 - UE)
Usage	Standard paints or other materials.	2K media (mixed resin and catalyst).	Abrasive materials like zinc or aluminium paints.
Material	Leather, PTFE	PTFE, PE-UHMW	PTFE with 15% graphite, PE-UHMW

	PU
Part No.	N24960070 + N24960071 for EcoPump VP 250 360 (N24170025)
Usage	Water-borne paint and water-borne wax, acidic catalysts.
Material	PU, EPDM, PTFE, Brass

EcoPump VPS

Air operated vertical shovel plate pump

The **EcoPump VPS** is an air operated shovel plate pump for medium to high viscosity fluids as glues, oils or wax. Its modular design allows an easy maintenance and with its optimized fluid part the material will be pumped considerably. The proven design and a long term durability make these pumps the perfect choice in the high viscosity application.

CUSTOMER BENEFITS

EcoPump AD

Air operated diaphragm pumps

A wide choice of materials for the pump housing makes the **EcoPump AD** the best solution for different kinds of fluid handling such as abrasive and particle containing fluids. The typical field of application of the **EcoPump AD** is to handle oil, water, waste liquids with and without solid particle debris, water and solvent-borne paints, varnishes, enamels and lacquers. The **EcoPump AD** pump will operate in circulation or direct fluid delivery mode. The simple design of **EcoPump AD** allows easy maintenance and service.

EcoPump9 GW 20

Gear wheel dosing pumps

The **EcoPump9 GW** is a highly efficient gear wheel pump, cavity-free in a compact configuration, achieving a perfect color change with a very low purging time. It has been manufactured and tested in compliance to Dürr's well-proven quality standards. Based on decades of experience in the area of paint application, the **EcoPump9 GW** has emerged as the perfect device for 1K and 2K dosing of water and solvent-borne paint.

PRODUCT LINE	
	EcoPump9 GW
Part No.	N24190001V
Flow per revolution	0.45-4.5 cm ³
Min. / Max. speed	20 / 200 rpm
Connector inlet / outlet	Dürr paint fitting
Max. fluid pressure	20 bar (290 psi)
Dosing accuracy (+/-)	2.0%
Bypass	Optional
Overpressure valve	Optional
Pressure sensor	Optional
DLC coating	included in pump size 3 and 4.5 cm ³

CUSTOMER BENEFITS

Low installation space required due to small footprint

Minimal purging time

Targeted purging of the shafts and bearing bore by patented wash-up system

Fast pre-paint bypass valve (with purgeable pump)

High stability due to patented construction

Usage of hardened stainless steel with DLC coating to reduce friction and abrasion

Modular pump concept

Quick disassembly of paint hoses

Large operating range

Simplified service & maintenance

Tested according to Dürr quality standards

TECHNICAL ILLUSTRATION

1 - Material outlet „PA“, 2 - Material inlet „PE“, 3 - Fluid receiver, 4 - Hole of the pressure sensor, 5 - Control air for diaphragm valve, 6 - Control air valve, 7 - Rinsing agent connection

EcoPump Packages

Ready to use sets

The pump packages are fully assembled portable modules, which are ready to use. The modular design ensures the use in multiple industries including wood finishing and exterior painting. Equipment for high-pressure coating based on **EcoPump VP** pumps are available as well as low pressure coating devices which use a line of diaphragm pumps. Variability is ensured by wide configuration options where the selection is made between different assembly modules like carriage, suction type or optional accessory to extend user's comfort.

EcoPump VP Package

Modules overview

1 Pumps

Pumps are delivered in different ratios and displacement volumes.

2 Maintenance units

Used for inlet air regulation. Units are attached according to motor type and application method used (Airless, Air-assist).

3 Material feeding

- Direct suction
- Flexible suction
- Feed cup (6 liters)

4 High pressure filter

High pressure filter is used for filtration of fluid on pump outlet. It has also a function of pulse damper.

5 Pressure relief units

Used for safe relief of pressure from fluid section. There are different variants depending on package configuration.

6 Racks

- Trolley
- Mobile stand
- Wall mount

EcoPump2 VP Package

New generation of high-pressure spray package

optional

Control unit

- stroke counter
- operation statistics

Maintenance units

- Air Assist or Airless
- optional nozzle cleaner

Fluid feeding units

- direct suction
- flexible suction (up to 200 L barrels)
- vessel (6 liter)

Pressure release unit

- flexible hose
- direct fix outlet

optional

High-pressure filter

- up to 500 bar
- four outlets available
- elimination of pulsation

Racks

- one trolley fits to all pumps
- wall mount

Pumps

- new generation of high pressure pumps
- five types available
- max. pressure range from 80 to 300 bars
- optional ice reduction kit

optional

Pressure regulator

- fine pressure regulation

Fluid outlet manifold

- up to 3 spray guns
- integrated pressure gauge

VARIANT EXAMPLES

EcoPump VP2 package

EcoPump AD Package

Modules overview

1 Diaphragm pumps

Air operated diaphragm pumps are available in different design configurations.

2 Maintenance units

Used for inlet air regulation. Regulator can be also used to control air pressure for connected spray gun.

3 Material feeding

- Direct suction
- Flexible suction
- Feed cup (6 liters)

4 High pressure filter

High pressure filter is used for filtration of fluid on pump outlet. It has also a function of pulse damper.

5 Fluid regulator

Optional fluid regulator allows to adjust the outlet material pressure precisely. May be optionally equipped with pressure gauge.

6 Racks

- Trolley
- Mobile stand
- Wall mount

Connector air	Depends on the control unit	Depends on the control unit
Plate material	Aluminium cast and PU	Aluminium cast and NVC
Ambient operating temperature	10-40 °C	10-40 °C
Max. flow rate	Depends on the used pump	Depends on the used pump
Diameter barrel	360 mm, 279 mm	571 mm

Product upon request.

TECHNICAL ILLUSTRATION

1 - Power chain, 2 - Pneumatic motor, 3 - Follower plate, 4 - Lifter, 5 - Pneumatic cylinders, 6 - Ventilation bar, 7 - Ground plate

CUSTOMER BENEFITS

To supply high viscous material from up to 60 l barrels and up to 200 l barrels

Two lift cylinders for an exact guidance and a constant power transmission

Different follower plates for several barrel types

Simple and compact pneumatical control system

High flexibility regarding the medium due to various available pumps

Different complexities of sensor systems, adaptable for the scope of application

Available from a simple to a complex version

EcoRAM

High viscosity supply system

EcoFlow HPR – high pressure return regulators

EcoFlow LPF – low pressure flow regulators

EcoFlow LPR – low pressure return regulators

EcoFlow HPF

High pressure flow regulators

The **EcoFlow HPF** is a high pressure flow regulator designed to maintain downstream pressure in fluid supply systems. By controlling the media pressure to the required working pressure, connected applicators are protected against pressure surge and pulsation from the material supply, while maintaining the required pressure and flow characteristics for the application process. Typically handled materials are high viscose fluids such as mastics, sealers, pastes, adhesives or glues.

EcoFlow HPR

High pressure return regulators

The **EcoFlow HPR** is a high pressure return regulator designed to maintain consistent back pressure in fluid supply systems. By controlling the fluid pressure to the required working pressure, applicators are protected against pressure surge and pulsation from the material supply, while maintaining the required flow characteristics for the application process. The **EcoFlow HPR** is easy to maintain with a 100% tight sealing function and compact dimensions. Typically handled materials are high viscose fluids such as mastics, sealers, pastes, adhesives or glues.

EcoFlow LPF

Low pressure flow regulators

The **EcoFlow LPF** is a low pressure flow regulator designed to maintain downstream pressure in fluid supply systems. By controlling the fluid pressure to the required working pressure, applicator equipment is protected against pressure surge and pulsation from the material supply, while maintaining the required flow characteristics for the application process. Typically handled materials are water and solvent-borne paints, varnishes, enamels and lacquers.

TECHNICAL ILLUSTRATION

1 - Pump, 2 - Pressure flow regulator, 3 - Spray guns, 4 - Return flow regulator

FUNCTIONAL PRINCIPLE

Pressure regulators are either used to limit the pressure of the paint after the regulator (flow regulator) or to maintain a certain pressure level before the regulator (return regulators). In flow regulators either a spring or compressed air on a diaphragm holds a valve open. If a pressure higher than the force of the springs operates on a diaphragm, the valve starts to close and reduces the pressure. In return regulators, the spring holds the valve closed until the pressure on the inlet of the regulator exceeds the force of the spring. The valve starts to open, paint flows and the pressure before the regulator decreases.

CUSTOMER BENEFITS

- [Precision control](#)
- [Excellent dynamics during pressure changes](#)
- [100% tight sealing function](#)
- [Compact dimensions](#)
- [High performance diaphragm](#)
- [Easy to maintain](#)
- [Tested according to Dürr quality standards](#)

EcoFlow LPR

Low pressure return regulators

The **EcoFlow LPR** is a low pressure return regulator that has been designed to maintain consistent back pressure in fluid supply systems. By controlling the fluid pressure to the required working pressure, applicators are protected against pressure surge and pulsation from the material supply, while perfect flow characteristics for the application process are ensured. **EcoFlow LPR** is easy to maintain with a 100% tight sealing function and compact dimensions. Typically handled materials are water and solvent-borne paints, varnishes, enamels and lacquers.

Pressure relief valves

Product families

Pressure relief valves

Pressure relief valves

As an enhancement to the **EcoPump HPE**, the pressure relief valve prevents possible damages caused by unpredictable excess pressure. It is simply connected directly to the outlet of the pump. Protection against pressure peaks and improper use is guaranteed by the pressure actuated valve. By using the optionally available sensor in the relevant port, the pressure relief valve is the perfect interface to allow full closed-loop control of the pump. Typical fluids include water and solvent-borne paints, varnishes, enamels and lacquers.

Air operated agitators

Product families

Agitators A MAN – manual air operated agitators

Agitators A FIX – fix mounted air operated agitators

Agitators A MAN

Manual air operated agitators

Dürr has developed a group of pneumatic agitators used in the preparation of paint before application or to prevent settling of the paint during spraying. Various shaft lengths are available. An optional stand is available to allow mixing without assistance of the operator. The pneumatic drive allows the safe use in a paint shop environment.

Agitators A FIX

Fix mounted air operated agitators

Good preparation is essential for high quality application of the material (paint, glue, penetration etc.). For large containers, Dürr has developed a line of fixed mounted agitators. They are available for 60 or 200 liter (15 or 60 gallon) tanks. The agitators are air operated and usually fixed to the lid of the container. There are multiple propellers available selected by the material used.

Filters

Material filtering

Product families

Filters HP – high pressure material filters

Filters LP – low pressure material filters

Filters HP

High pressure material filters

High pressure filters can be used for the filtration of paint or any other kind of fluid. Several different filter sizes are available. The filter design allows a tool free filter maintenance. Up to four devices can be connected (three on the sides, one on the bottom). Due to its robust design the filter can be used in low and high pressure applications with a maximum fluid pressure of up to 500 bar (7,250 psi). Additionally the filter helps to reduce the fluids' pressure pulsation.

Hoses

Air & paint hoses

Every application requires some sort of media connection. There are hoses which can be used for pneumatic motor air supply and atomization air for air spray guns. On the other hand there are hoses for fluid supply (paint, glue etc.) from pressure pots to automatic air spray guns. High pressure hoses are used for the delivery of high viscose materials from high pressure pumps. There is a wide range of Dürr hoses that fit into any possible application. Easy configuration on our webshop helps you to select the right hose for your needs.

EcoRP 10 R1100 – small ready to spray painting robot

EcoRP 10 R1100

Small ready to spray painting robot

The **EcoRP 10 R1100** is a six-axis robot with a maximum reach of 1,100 mm and a total payload of up to 10 kg. Equipped with paint application technology for 1K and 2K applications, high- and low pressure as well as water and solvent-borne paint, the **EcoRP 10 R1100** is the perfect choice for electrostatic and other paint applications, that serve the requirements in various industries. The interaction of robot and high-speed rotating atomizer convinces through maximum repeatability and continuous precision. The paint can be charged by high voltage which achieves a transfer efficiency of up to 90%. The maintenance requirements are reduced to a minimum due to the modular design and the lifetime lubrication.

CUSTOMER BENEFITS

Explosion proof robot with 6 axis and a reachability of 1,100 mm

Flexible control system for motion and process

Various interfaces to connect with third party devices (e.g. Line-PLC)

Suitable for wall, ceiling or floor installation

Modern user interface

All common paint processes are supported (Bell / Gun, 1K / 2K, High / Low-Pressure)

ready2spray: Preassembled equipment for fast ramp up time

EcoAUC – control units for spray process control

EcoAUC

Control units for spray process control

Fill your application products with new life with the EcoAUC control system. PLC and valve technology allows to operate color change systems from the EcoMCC family with up to 10 colors. Dosing is carried out using the high efficient gear dosing pump EcoPump9 GW or the compact paint pressure regulator EcoFlow. To maximize efficiency, the integrated control for a high speed rotary atomizer can be extended by a high tension cascade for external or direct charge. EcoAUC can also control various automatic spray guns with air spray, airless or air-assist application technology as well as the EcoPaintJet. Despite numerous features the operation of the EcoAUC always remains straightforward and simple due to a modern interface.

PRODUCT LINE	
EcoAUC	
Part No.	F30310001V
No. of colors	1-10
Air pressure	6-8 bar (87-116 psi)
Supply voltage / Freq.	380-480 V / 50-60 Hz
Effective power	4,000 W
Protection class	IP54

CUSTOMER BENEFITS

Compact structure with modern design

Colored 7" touchscreen for ease of use

Various interfaces (emergency shutdown, ethernet, released for process technology etc.)

Quick start with default brushes and automatic sequences for purging and pre-charging

Simplified service and maintenance

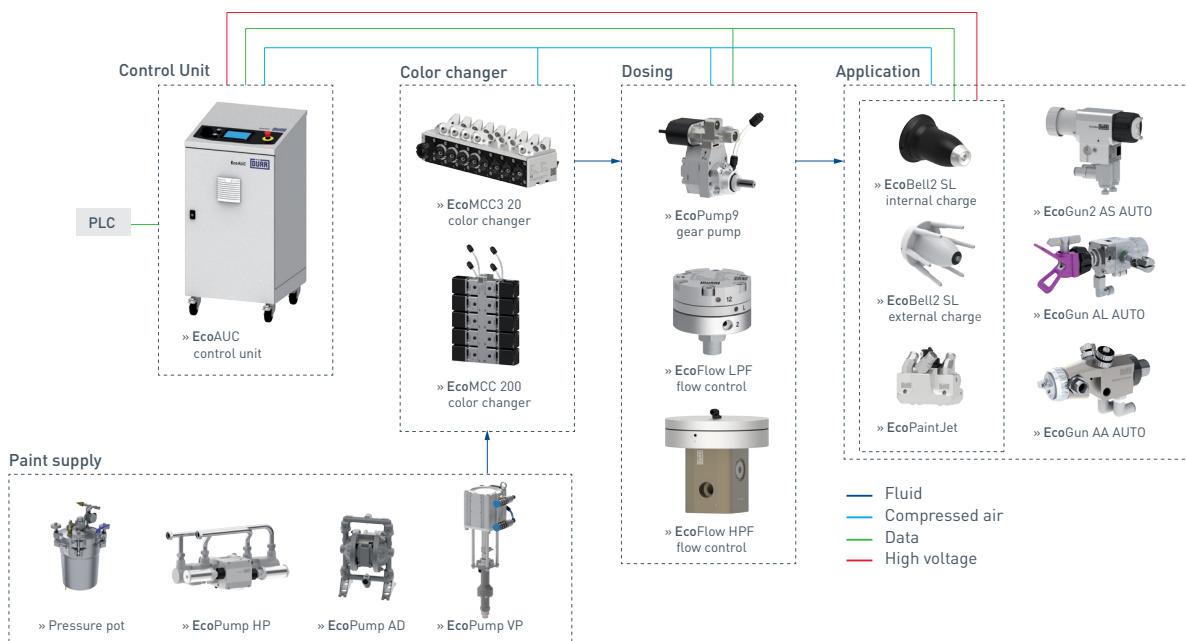

Control of color changer with 1-10 colors

Control of high speed rotating atomizer with external or direct charge

Control of automatic spray guns or high rotational atomizers

Control of EcoPaintJet

EcoPUC A

Control units for air operated pumps

Product families

EcoPUC A – control units for air operated pumps

EcoPUC A

Control units for air operated pumps

The **EcoPUC A** is an intrinsically safe control unit, used to monitor pneumatic pumps (e.g. **EcoPump VP** or **EcoPump HP**) while in operation. A reed-sensors enables the **EcoPUC A** to count the pumps current number of cycles. Additionally an intelligent algorithm identifies when the pump runs dry. The integrated solenoid valve stops the pump when running dry, to avoid excessive wear. The **EcoPUC A** also reminds the maintenance personnel when the pump seals have to be exchanged. A Profibus PA interface allows to intercommunicate with external PLCs.
