

EcoGun AL MAN 300

Spray gun airless manual

Manual airless spray guns are suitable for high pressure paint application. They can be used for anti corrosion protection coating of large steel structures or coating of wood structures. Functionality can be extended by using extensions which can help to paint areas which are difficult to reach. The modular design of these extensions allows to assemble different lengths and angles. Airless spray guns may be used with reversible nozzles that are available in a large number of sizes and angles.

CUSTOMER BENEFITS

Perfectly balanced ergonomic shape of spray gun body that minimizes fatigue

Material passage ways made of stainless steel

External material supplying part allows application of heated paint

Wide range of available spray nozzles

Optional extensions available (up to 900 mm)

Easy cleaning and maintenance
